

God has blessed our church family with tremendous growth over the years, and because of that we are beginning to bump up against the physical limitations of our facility. Now is the time for TCC to take a bold step forward in our ongoing commitment to reach our community for Christ.

To maximize our ministry potential we must create more open seats at optimal worship times. The question is, how can we do this? We anticipate pursuing two paths simultaneously. First of all, in the future we foresee TCC being, "One Church with Multiple Locations." Within the next three years we would like to plant churches in the Holly Springs/ Fuquay-Varina and/or Cary/Apex communities. We anticipate that some in our church family who live in these communities would appreciate the ability to worship closer to home. This has two added benefits. It makes it easier for them to invite their neighbors to worship with them and it frees up seats at our present site.

In addition, we anticipate expanding our present church facilities by enlarging our educational space for our children and youth, and perhaps constructing a small worship center which will be connected to our present worship center via high definition video. All facets of these services will be live with the exception of the teaching, which will be delivered live in one venue and experienced in the others via high definition video.

All of these future plans are dependent upon a needed technological upgrade of our present facility. Having this technology in place will not only allow us to extend our ministry in a cost efficient manner, it will greatly improve our present worship and learning experience. In addition, the ability to capture, edit and repurpose our teaching will immediately multiply the discipleship and outreach capacities of our church.

Our pressing goal is to raise the \$250,000 needed for our technology upgrade. We would like to raise this money by **August 1st**, cash in hand, so that we will be ready to fully utilize our new capabilities in the Fall.

This is what I want you to do:

1. Prayerfully ask God what He would have you do in terms of making a cash contribution toward this critical technology upgrade.
2. Give as generously and sacrificially as you possibly can. (This is to be above and beyond your normal giving to TCC.)

You may make your contribution anytime, but our goal is to raise all of the needed funds by August 1st. That will give us the time that we need to design, install and familiarize ourselves with the technology before rolling it out in the Fall.
